Get more bang for your buck with one machine that does the work of two! Strip, scrub, spray-buff, polish, shampoo, bonnet clean...you name it, this machine does it all! Designed for professional floor care maintenance, the dual speed floor machines from EDIC are equipped with long-wearing steel triple planetary gearboxes, providing heavy duty yet quiet operation. Safety comes first with the exclusive "lockout" lever that allows the motor to be activated while keeping both hands on the handle grips. Use the lower speed to scrub and strip then just flip the switch to high speed and polish floors to a glossy luster. Operation is smooth and easy in even the toughest commercial settings.

ADVANCE ADVAC 12DC UPRIGHT VACUUM

Vendor:

 MMS Code **ADV-CARPETW**
 Vendor Code **CARPETWIN 14**
 Unit of Measure **EACH**
 Case Pack: **EACH**
 Case Wgt: **0.000**
 Cube: **0.000**
 UPC Code:
 UNSPSC **47121602**

The CarpeTwin® 14 and 18 upright carpet vacuums clean a 14 or 18 inch (36 or 46 cm) path, shaking loose and drawing out embedded dirt and grit that shorten carpet life. Five-stage filtration on the CarpeTwin keeps dirt and dust under control. It begins with a two-ply 244 cubic inch (4 liter) paper filter/collector bag. (An optional cloth filter/collector bag is available.) The vac motor is filter protected so it will last longer. The final filter is a hospital grade filtration media. It protects your indoor air quality by filtering to 0.1 microns and exhausting only clean air. Sound insulation also keeps the CarpeTwin vacs hospital quiet, at only 69 dB A. With a two-motor design, separate motors drive the brush and the vacuum. The brush motor has electronic overcurrent protection, and a thermal relief valve protects the vacuum motor. The 5,000 rpm chevron bristle brush is removable, and is motor-driven by a gear belt that won't slip or wear out.

 Vendor Code **P20**
 Unit of Measure **EACH**
 Case Pack: **EACH**
 Case Wgt: **0.000**
 Cube: **0.000**
 UPC Code:
 UNSPSC **47121603**

Whether stripping, scrubbing, screening, or bonnet cleaning, the Advance Pacesetter line of floor machines has a model to fit your needs and applications. Each of the four Pacesetter models is built with an all cast metal, chrome plated base. The heavy-duty construction and durability of the Pacesetter sets it above the competition. All Pacesetter models have an ergonomic molded handle that protects the user's hands during operation along walls and around corners. A red safety lock switch allows the operator to easily control when the machine goes into operation. An easy-to-use compression style lever changes the height adjustment of the handle for all operators. Pad holders are standard on the Pacesetter, and the yellow, super-flex cord offers ease in cord handling and reduced tangling. A clear plastic hospital plug allows the operator to verify the electrical integrity of the connection at each use of the machine.

ADVANCE WHIRLAMATIC 20" FLOOR BURNISHER

Vendor:
 MMS Code **ADV-W20**
 Vendor Code **W20**
 Unit of Measure **EACH**
 Case Pack: **EACH**
 Case Wgt: **0.000**
 Cube: **0.000**
 UPC Code:
 UNSPSC **47121603**

For superior performance, durability and simple operation, depend on the Whirlamatic 20 UHS. This 20 inch (43 & 51 cm) cord electric burnisher gives floors a mirror-like shine in one pass. Incorporated into this burnisher are performance features that ensure maximum productivity. An exclusive Constant-Flo™ design uses a patented torsion spring design to eliminate any operational variances and the need for caster wheels, making burnishing almost foolproof. Neither uneven floors nor operator inexperience can affect the brush/pad pressure. Weight is evenly maintained while brush/pad turns at 1500 rpm's. The result is a consistent luster across the floor.
